

LOW VOLTAGE CABLE

01

High-quality oxygen-free pure copper

High load capacity, excellent conductivity, and oxidation resistance.

02

Low eccentricity

The insulation thickness is uniform, effectively preventing breakdown.

03

XLPE insulation layer

Highly flame retardant, UV resistant, anti-aging, for use long lifespan.

04

Tensile filling compound

Stretching and impact resistance, more durable.

05

Waterproof and moisture-proof

Double protection of PVC outer sheath and inner waterproof coating
