

# LOW VOLTAGE CABLE

## PRODUCT DETAILS

### Product Parameter

#### YJV Single Core Copper Cable

**Voltage:** 0.6/1KV

**Conductor:** Pure Copper

**Insulation:** XLPE

**Sheath:** PVC

**Temperature Rating:** 90°C

**Colour:** Black/Orange

**Product Application:** Widely used in urban power grids, mines, factories and other fields.

**01**

### High-quality oxygen-free pure copper

High load capacity, excellent conductivity, and oxidation resistance.

**02**

### Low eccentricity

The insulation thickness is uniform, effectively preventing breakdown.

**03**

### XLPE insulation layer

Highly flame retardant, UV resistant, anti-aging, for use long lifespan.
